

Features

The Chiron Pro is a wireless and ergonomic gaming mouse, with a precise optical sensor, adjustable DPI up to 16,000 and programmable side buttons with macro. Lightweight and comfortable, it offers a secure grip, customizable RGB lighting, great battery life, and a fast, quiet experience that's ideal for FPS, MOBAs, and all kinds of games.

DESIGN

The Chiron Pro is an ergonomic and ambidextrous gaming mouse, designed for any gamer profile and for long gaming sessions. Its robust and elegant construction combines continuous lines with durable materials, offering a secure grip. This lightweight and versatile mouse, with a design designed for comfort and precision, elevates your gaming experience to the next level.

ADJUSTABLE DPI AND PRECISE SENSOR

Equipped with a precise optical sensor, the Chiron Pro offers an adjustable DPI range from 800 to 16,000, ideal for games that require fast and precise movements, such as FPS or MOBA. Players can change the sensitivity on the fly to suit any playstyle and need.

PROGRAMMABLE SIDE BUTTONS AND MACROS

This mouse features side buttons equipped with Huano switches, which offer a fast and quiet tactile response, with a lifespan of up to 20 million keys. Plus, thanks to its programmable software, you can assign macros and customize each button to perform complex sequences with a single click.

LONG BATTERY LIFE AND WIRELESS CONNECTIVITY

The Chiron Pro is wireless, with a rechargeable battery that can last up to 58 hours of gaming with the RGB lighting on and up to 80 hours with the lights off. A full charge takes just 2 hours, allowing you to quickly get back into action without interruption.

ADVANCED SOFTWARE AND RGB CUSTOMIZATION

The software allows you to adjust all buttons, change DPI, change cursor speed, and customize RGB lighting to suit your setup. Its support for FPS, MOBA, and other game genres ensures complete control, and programmable macros optimize every action with precision.

Technical specifications

GENERAL SPECIFICATIONS

Model No.: CHIRON PRO
Material: ABS
Type: Dual (USB Type-C + 2.4Ghz wireless cable with Nano USB receiver)
Sensor: Pixar PMW3335
DPI: up to 16,000 (800, 1200, 1600, 2500, 5000, 16000)
Max Acceleration: 40G
High-speed motion detection: 400 IPS
Buttons (programmable): 8 + ON/OFF switch
RGB lighting with 10 modes
Switches: Huano, up to 20 million clicks.
Foot pads: Super strong Teflon adhesives
Cable (paracord): 1.8 m
Power supply: 5V – 200mA
Maximum Probing Rate: Up to 1,000 Hz
Weight: 88 gr (95g with cable)
Product dimensions (WxAs-Surface): 12.4 x 6.75 x 3.95 cm
Software: Yes

BATTERY

Capacity: 650mAh, 3.7V
Runtime: Up to 58 hours (80 hours without lights)

COMPATIBILITY

Windows (all versions) / MAC / Linux

DIMENSIONI

Imballaggio (LxLxH) e peso: 5,8 x 14,5 x 13,7 cm; 350 gr.
Garanzia: 3 anni

Package Contents

Newskill Chiron Pro
USB receiver
Charging cable
Digital QR Manual
