

Features

The Newskill Kitsune V2 is an ergonomic chair designed to adapt to both the office environment and the most intense gaming sessions. Its steel structure and high-density foam provide a comfortable, durable, and high-quality experience. Equipped with adjustable 2D armrests, reclining backrest up to 180°, cervical cushion and lumbar cushion, it offers additional lumbar support and promotes a healthy posture with each use, becoming a professional gamer design seat.

ERGONOMIC DESIGN

Made with high-density molded foam, the Kitsune V2 guarantees firmness and long-lasting comfort even during long days. Its steel frame with breathable fabric ensures resistance and ventilation, while the two-way adjustable armrests allow you to improve posture and personalize the user experience. The result is a professional seat designed to balance ergonomics and comfort in every game or workday.

PREMIUM VERSATILITY

The Kitsune V2 has a butterfly mechanism, with a backrest that reclines from 90° to 180° and rocks up to 15°, as well as lifting by means of an 80 mm class 4 gas piston. Includes cervical cushion and lumbar cushion for extra support in the neck and lower back, providing comfort and a healthy posture both in the game and in the office.

GUARANTEED DURABILITY

Thanks to its metal structure, steel base and high-quality breathable materials, the Kitsune V2 ensures a long lifespan. Its molded foam and robust construction make this chair a durable and reliable option, perfect for intensive daily use.

STABILITY AND MOVEMENT

Its steel base offers great stability, while the quiet 60 mm wheels with PU coating allow a smooth and safe ride on any surface. The class 4 gas piston supports up to 136 kg and ensures a precise and stable fit in every movement.

FUNCTIONALITY AND COMFORT

With a modern style and gamer design, the Kitsune V2 improves posture and adds a professional touch to any setup or workspace. Its solid construction, along with the adjustable 2D armrests and lumbar support, provide ergonomics and prolonged comfort, making it the ideal choice for those looking for performance, comfort and a single professional seat for gaming and office.
