

Features

The Newskill Pyros Pro is a 75% compact gaming keyboard with 83 keys and a volume wheel, combining robust design and agile performance. With linear and blue Outemu network mechanical switches, hotswap function and triple connectivity (wired, 2.4G and wireless), it offers fast, stable and quiet typing. Made of ABS with backlit RGB and double layer of foam to reduce noise, it stands out for its durability and portability thanks to its 1200 mAh battery. A practical and complete keyboard for those looking for performance and mobility.

DESIGN

The Newskill Pyros Pro is a 75% gaming keyboard that integrates 83 keys and a volume wheel, offering an optimal gaming and typing experience in a tenkeyless format. Its design allows you to make the most of desk space without sacrificing key functions, while its robust construction makes it a versatile option for both gamers and professionals. It is perfect for compact setups.

PERFORMANCE

In performance, it is equipped with Outemu linear and blue network mechanical switches, which offer fast, accurate and immediately responsive typing. The hotswap feature allows switching switches and programming macros with its customizable software. Its triple connectivity (wired, 2.4G and wireless) ensures stable and flexible connection.

GUARANTEED DURABILITY

Durability is another of its strengths: made of high-quality ABS, it incorporates backlit RGB lighting and laser-printed keys. Its structure includes two layers of foam that reduce noise and improve comfort when writing. Thanks to its quiet and robust design, it is a mechanical keyboard designed for long gaming or work sessions.

INTEGRATED VOLUME WHEEL

The built-in volume wheel facilitates quick and efficient audio control, allowing you to adjust the sound with a single twist without interrupting the game or leaving the main screen. Along with its RGB lighting and programmable keys, it ensures an immersive and uninterrupted experience.

PORTABILITY AND AUTONOMY

Finally, the Pyros Pro stands out for its portability and autonomy. Its 1200 mAh battery offers long sessions of use without interruptions, while its compact dimensions (327 x 135 x 41 mm) and its weight of 657 g make it easy to transport.
