

Features

The new Newskill Serike V2 has been completely redesigned to offer a superior writing and gaming experience. With a minimalist aesthetic, straight lines and high-quality finishes, it adapts to the latest trends. Its aluminum structure and armrest with memory foam padding and magnetic support provide you with the comfort and support you need for your long gaming or work sessions.

IMPROVED DESIGN

In terms of design and structure, the Serike V2 has been completely redesigned, adopting a more minimalist aesthetic with straight geometries and blunt corners. The reinforced aluminum structure, the high-quality materials of the keys and the armrest with memory foam padding and magnetic fastening, not only improve its aesthetics, but also ensure superior comfort and durability for any use.

HOTSWAP

One of the main improvements is the new PCB with interchangeable bases that allows mechanical switches to be installed individually, offering infinite customization. The base uses the standard 3-pin connector, making it compatible with the new NewSwitch switches and any other switch with the same connection type. In addition, it now supports "Snap-in" stabilizers for keys such as the space bar.

NEW DETAILS

The Serike V2 includes an armrest with memory foam padding and magnetic support that prevents movements and adds extra comfort. In addition, connectivity has been enhanced with a removable USB-C cable that is more convenient for management, transport, and allows you to customize it with different additional cables.

SOFTWARE

The new Serike V2 software allows you an infinite number of configurations. You can customize lighting, remap key function, create FN function shortcuts or macros. It also allows you to create individual profiles for specific work environments or games, completely adapting to your needs.

Technical Specifications

GENERAL SPECIFICATIONS

Model: Serike V2
Format: Full keyboard (Full layout) 104 keys
Chassis: Aluminum finish
Lighting: RGB (configurable from keyboard and software)
Switch: Mechanical - NewSwitch Red (Linear)
Hotswap function (switches): Yes (interchangeable)
Keys: Double-injected ABS
Layout: ES (QWERTY/ISO) with Ñ key
Connection: USB Type-A (removable)
Simultaneous Press: Full (NKRO), 100% Antighosting
Refresh rate: 1,000 Hz
Onboard Memory: Yes
Adjustable Height: 2 positions
Armrest: Yes (magnetic adjustment to keyboard)
Product dimensions: 13.8 x 44.4 x 2 cm (L x W x H)
Weight: 1.14 kg
Warranty: 3 years

INCLUDED ACCESSORIES

Set 8x Green NewSwitch Switches (Clicky)
Set 8x Violet NewSwitch Switches (Tactile)
Set 8x Custom Newskill Gaming Keycaps
Key and switch removal tool

DIMENSIONS AND WEIGHT

Packaging: 18.0 x 47.0 x 6.5 cm (H x H x D)
Weight: 1.55 kg

Package Contents

Newskill Serike V2
Set 8x8x8 Switches NewSwitch
Newskill Custom Keys
Key and switch removal tool
