

Features

The Nfortec Stellar Fan is a 120mm ARGB gaming fan designed to optimize PC cooling with simple assembly and a modern design. Thanks to its innovative Easy Click system, it allows you to connect several modules with a single cable, reducing internal management and facilitating installation in gaming chassis or AIO radiators. Its 9-blade aerodynamic design ensures a constant airflow of 47.21 CFM, a static pressure of 1.41 mmH₂O and a reduced noise level of only 22.6 dBA, achieving a perfect balance between performance and silence.

QUIET AND LONG-LASTING COOLING

Equipped with hydraulic bearings and anti-vibration pads integrated into the frame, the Stellar Fan ensures stable and quiet operation. Its estimated lifespan of 30,000 hours makes it a durable and efficient fan, ideal for heavy-duty sessions and high-performance equipment.

CUSTOMIZABLE ARGB LIGHTING

The Stellar Fan integrates a 5V addressable ARGB lighting system, fully compatible with standard motherboards and controllers. Its high-brightness LEDs offer a wide range of dynamic and customizable effects, which can be synchronized with the rest of the equipment components to achieve a unique and professional finish.

EASY CLICK MODULAR DESIGN

Its modular design 2+1 fans allows interconnecting several units with a single cable, reducing internal wiring and facilitating a clean and tidy assembly. This system makes the Stellar a versatile, practical chassis fan with an impeccable visual finish.

VERSATILITY AND UNIVERSAL COMPATIBILITY

Available in Black and White, the Stellar Fan adapts to any configuration thanks to its connectivity through 4-pin PWM and 3-pin ARGB, guaranteeing universal compatibility. As a gaming PC accessory, it combines thermal performance, low noise level and customizable lighting, being the perfect choice for those looking to maximize the cooling of their equipment without sacrificing style.

Technical Specifications

GENERAL SPECIFICATIONS

Model No.: Nfortec Stellar Modular ARGB Fan
 Dimensions: 120×120×25 mm
 Number of blades: 9 (aerodynamic design)
 Lighting: 5V Addressable ARGB (3-pin)
 Bearing: Hydraulic
 Anti-vibration pads: Yes, integrated into the frame
 Fan Speed: 800–1800 RPM ±10%
 Airflow: 47.21 CFM
 Static pressure: 1.41 mmH₂O
 Sound Level: 22.6 dBA
 Estimated lifespan: 30,000 hours
 Power consumption: 1.2 W (fan) / 1.4 W (LED)
 Rated Voltage: DC 12V (fan) / DC 5V (LED)
 Starting voltage: DC 6V
 Net weight: 0.13 kg (unit) / 0.43 kg (pack 3)

CONNECTIVITY

1 × ARGB 5V Terminal (female)
 1 × 4-pin PWM 12V terminal (female)

DIMENSIONS

Packaging (LxWxH/Weight): 158×115×156.5 mm; 0.45 kg (pack 3)
 Warranty: 3 years

Package Contents

Nfortec Stellar Modular ARGB Fan (3-Pack)
 12V PWM Cable (4-pin, female)
 5V ARGB Cable (3-pin, female)
 Mounting screw set
 Digital QR Manual
