

Features

The Newskill Takamikura V2 is an ergonomic chair designed to adapt to both the office environment and intense gaming sessions. Its steel structure and high-density molded foam provide a comfortable, durable, and high-quality experience. Equipped with adjustable 4D armrests, reclining backrest up to 180°, cervical cushion and lumbar cushion, it offers complete support to promote a healthy posture with each use, becoming a professional seat with a modern gamer design.

ERGONOMIC DESIGN

Made of 45 kg/m³ cold-molded foam, the Takamikura V2 guarantees firmness and long-lasting comfort even during long days. Its steel structure covered with breathable fabric ensures resistance, durability and ventilation, while the four-way adjustable armrests allow you to customize your posture and user experience to the maximum. The result is a professional seat designed to balance ergonomics and comfort both at work and at play.

PREMIUM VERSATILITY

The Takamikura V2 incorporates a butterfly mechanism, with a reclining backrest from 90° to 180°, rocking function and height adjustment by means of a class 4 80 mm gas piston. Includes cervical cushion and lumbar cushion for additional support in the neck and lower back, ensuring comfort and a healthy posture in any environment.

GUARANTEED DURABILITY

Thanks to its metal structure, steel base and high-quality breathable materials, the Takamikura V2 offers a long lifespan. Its cold-molded foam and solid construction make this chair a reliable, resistant and perfect option for intensive daily use.

STABILITY AND MOVEMENT

Its five-pointed star-shaped steel base provides great stability, while the 65 mm wheels with PU coating allow a smooth and silent ride on any surface. The class 4 gas piston supports up to 150 kg, ensuring a secure and stable fit with every movement.

FUNCTIONALITY AND COMFORT

With a modern and gamer design, the Takamikura V2 improves posture and adds a professional touch to any setup or workspace. Its robust construction, along with the 4D armrests and lumbar support system, provide ergonomics and long-lasting comfort, making it the ideal choice for those looking for performance, comfort and a professional seat for gaming and office.
